

## Multi-Format to PDF Converter (Python)

The Multi-Format to PDF Converter is a highly efficient Python-based utility designed to convert various file formats into PDFs. This project demonstrates the power of Python in file handling, automation, and interoperability across different domains.

### Features:

- Convert TXT to PDF
- Convert DOCX to PDF
- Convert CSV to PDF
- Convert Markdown to PDF
- Convert Images to PDF
- Convert Jupyter Notebook to PDF
- Auto page breaks for long content
- Offline, fast and lightweight

### Installation:

```
pip install reportlab pillow pandas python-docx markdown
```
